

Luxury Italian mattress brand Magniflex is world-renowned for using natural materials such as soy, bamboo, sea algae and gold in its products. In creating the GeoEthic Collection, Magniflex has replaced the largest petroleum-based component found in other memory foams with a natural oil alternative. The foams in all Magniflex mattresses and pillows have always been based with water or latex – and now with soy and vegetable oil – to be healthy for both the consumer and the environment. Cover fabrics feature renewable fibers sourced from plant or marine life:

- Soy fiber in SoyGreen
- Bamboo fiber in EcoBamboo
- Corn fiber in Mais Prestige
- Marine algae fiber in Seacell Emotion

Visit us in Las Vegas, showroom C-1350, Space C50.
