Magniflex launches new mattress – Fresh Touch

Ahmedabad,

Magniflex, the world's leading mattress manufacturer's latest product 'Fresh Touch' illustrates just that and assures every user a 'soft rest and a fresh wake up'. Fresh Touch is crafted with a 3 layered design of Memoform Magnifoam, Elioform and Eliosoft to offer the perfect comfort and support to body, legs* and shoulders. While Memoform Magnifoam adapts according to the pressure exercised to fill the empty space of the body's silhouette, Eliosoft and Elioform has excellent breathability and gives density to improve the mattress' rigidity and deformability. The cover of the mattress is made of thermo-regulating Outlast Fabric, which is one of the most sophisticated fibres used in the textile industry. The Outlast Fabric was created by the research of NASA. It also offers the provision for customization to suit every size & shape of bed in India
