

ULTRA-FAST FIXES

An accessory edit is a fast, fun way to update a room. Take accessories off the shelves and start fresh. To avoid scattering your style, create groupings and themes of similar objects.

If you have lamps with good bones, changing your lampshades will dramatically change the look of a room — and the mood.

To quickly breathe new life into your bedroom décor, shop for sheets, duvets covers or comforters and throw pillows that make you want to luxuriate. Because the bed is the focal point of the room, introducing new patterns and colours will dramatically shift the ambience of the room.
